- ▶ CDIO initiative
- ▶ NextGenGov Initiative
- ▶ Benefits of becoming a NextGenGov officer

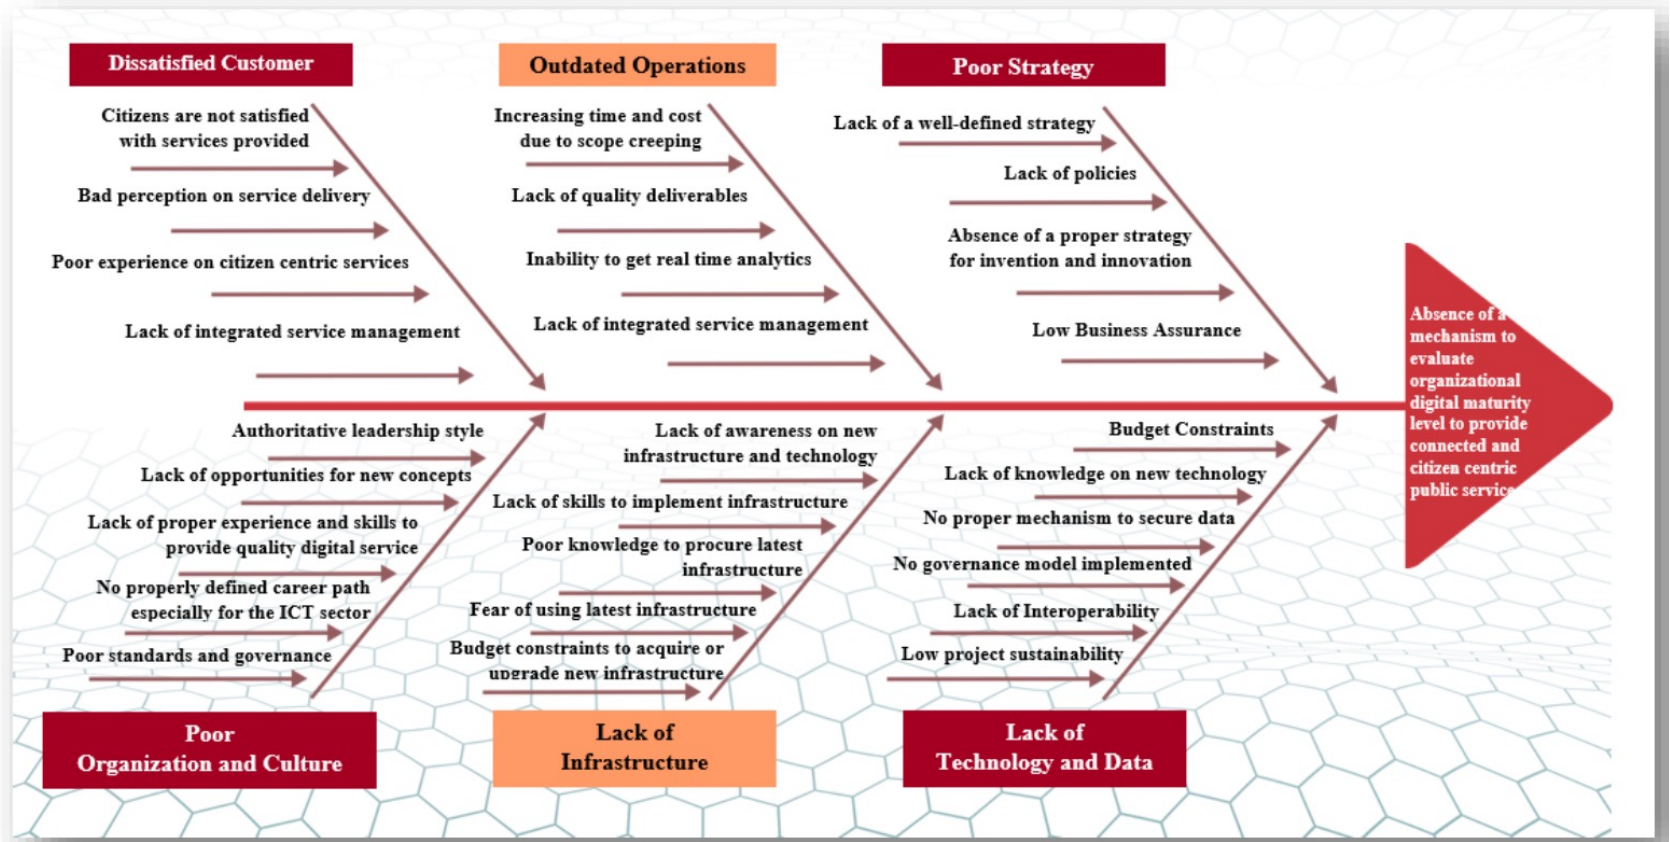

An Integrated Approach to Capacity Building

DIGITAL MATURITY MODEL

Digital Maturity Model of GoSL

Digital Maturity Model of GoSL

“In the government of Sri Lanka (GoSL), various types of organizations are providing a wider range of services to citizens and other entities, and these organizations are floating at different levels of maturity due to numerous practical challenges such as geographical conditions, unequal resource distribution, a lack of opportunities, etc. Hence, it is important to understand the category that the organization falls into is essential for progress in digital transformation initiatives.

This model provides a basis to assess the digital maturity of government organizations and publish the digital maturity of GoSL annually, for the organizations to understand the digital maturity of the organizations and implementation of relevant strategies to become digitally capable enterprises.”

Overall Objective: Facilitate government sector digital transformation through identifying the digital maturity and capability of government organizations.

Specific Objective: Develop a model to assess the level of digital maturity of the government organizations and publish the maturity status of GoSL on an annual basis.

The Structure of a Digital Maturity Model

CHIEF DIGITAL INFORMATION OFFICER

Significance of CDIO Initiative

- Rapid Digital Government transformation
- Expected cultural shift
- Evangelist of the digital transformation
- Sustainable progressive development
- Operating model with self reliance

Overall Objective

“Design and adopt the CDIO model which fit in to the upcoming digital government transformation”

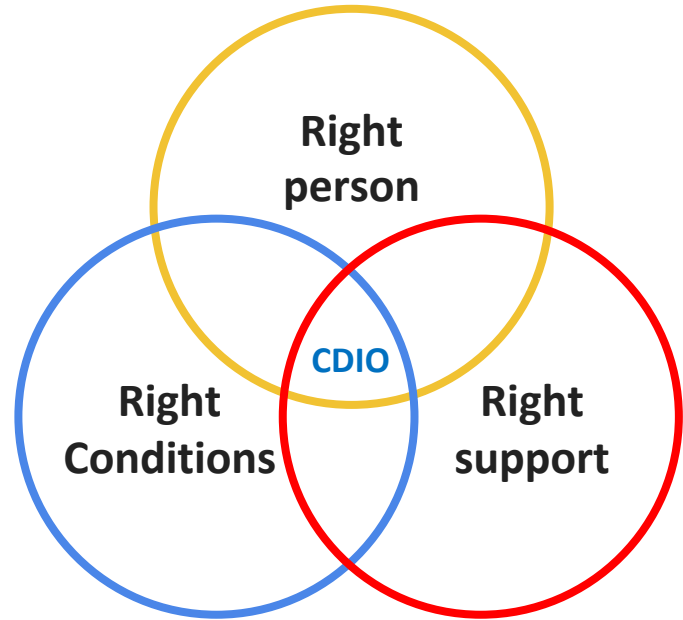

Specific Objectives

- Assess and identify capable existing resources and build competent pool of CDIOs through absorption and acquisition
- Establish the role of CDIO as the change agent who drives digital transformation
- Enhance the capacity of potential CDIOs
- Enforce CDIO governance mechanism with authority through the Ministry of Technology
- Appoint private sector top talent CIO resource panel to support and mentor CDIOs

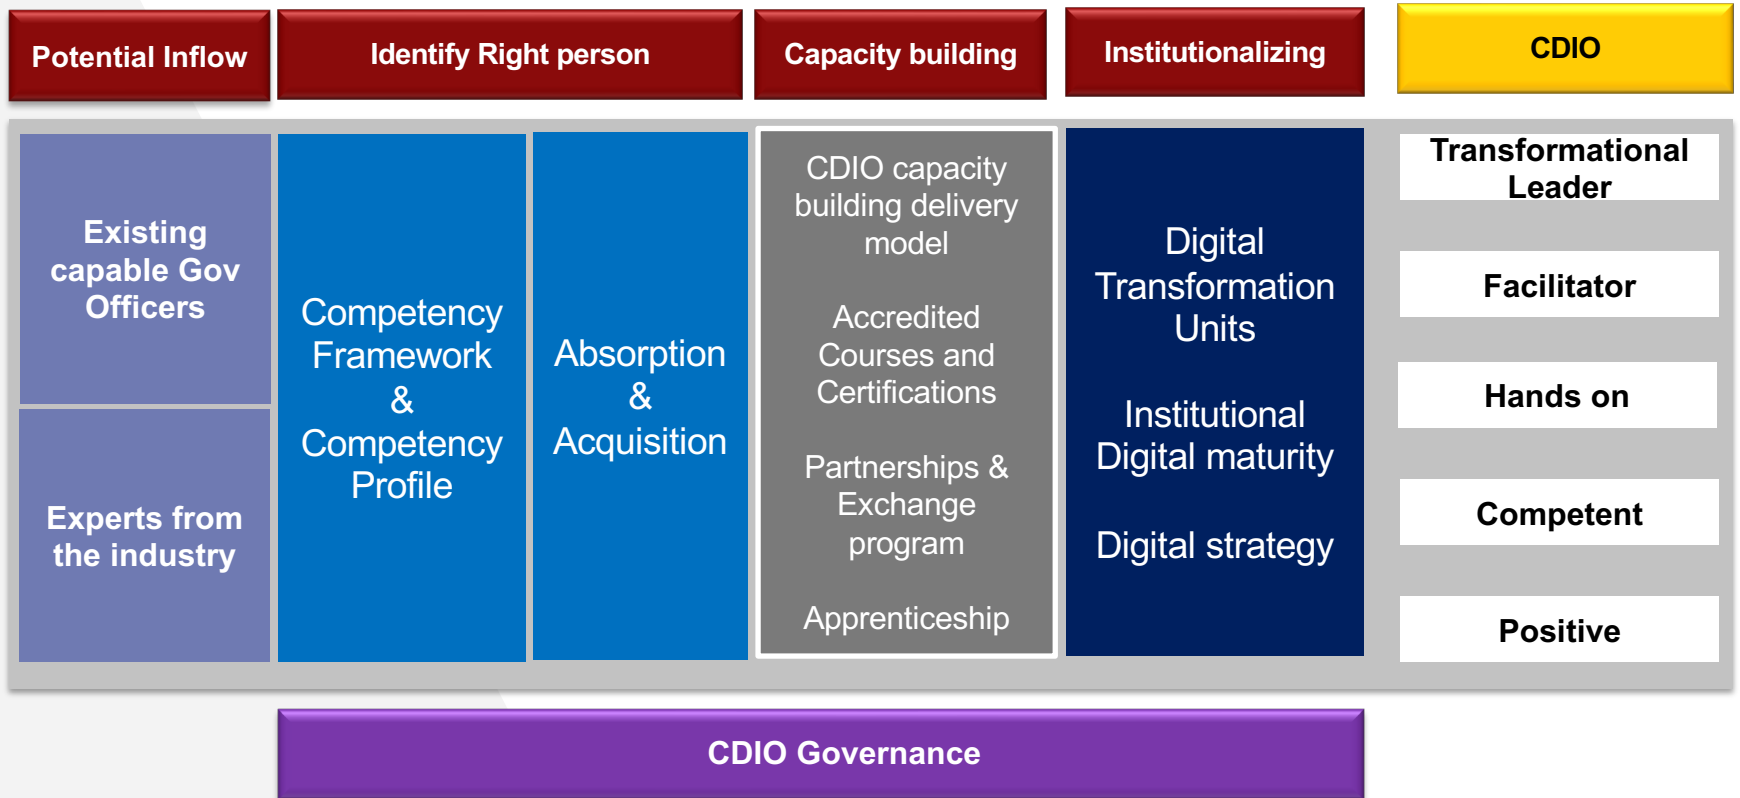

The CDIO

CDIO is a role that **brings together the experience and skills-set** of the Chief Information Officer and the Chief Digital officer.

CDIOs are **responsible for leading all aspects** of IT and digital strategy.

CDIO Framework

GOVERNMENT DIGITAL TRANSFORMATION UNIT (DTU)

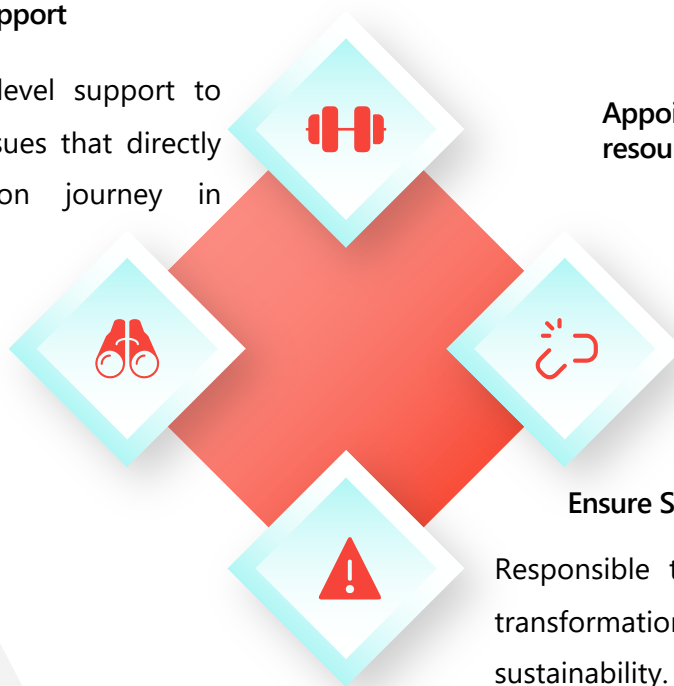

Importance of DTU

Dedicated Team to provide 1st Level Support

Dedicated team to provide first-level support to minimize day-to-day upcoming issues that directly affect the digital transformation journey in government organizations

Capacitate Resources

Capacitate identified resources to become competent to provide required support

Appoint leader and responsibilities to the resources

Appoint a leader to drive and support the digital transformation in the organization and assign respective responsibilities to the identified resources.

Ensure Sustainability

Responsible team to carry out digital transformation initiatives and ensure sustainability.

Structure of the Digital Transformation Unit

Leader

Leader

Is the leader of the unit who can be the head of the organization or similar.

CDIO/
DTU Lead

CDIO/ DTU Lead

The person who is responsible for facilitating digital transformation initiatives and lead the DTU. Can be CDIO or similar.

Technical
Support

Technical Support

Technical person to ensure consistent support. This can be increased depending on the requirement of the organization.

Change
Champions

Change Agents

Change agents will support the facilitator and the technical support person to drive the digital transformation. The number of change agents in the unit will depend on the requirement of the organization. Change agents could be adopted by the identified NextGen Gov initiative also.

CDIO in Government of Sri Lanka

Future ecosystem

CDIO Level	Organization Type	Digital Transformation Unit	Change Management Team
Level 01	Type A	Fully Fledged	Full
Level 02	Type B	Mid Scale	Mid
Level 03	Type C	Small Scale	Small

DIGITAL GOVERNMENT COMPETENCY FRAMEWORK

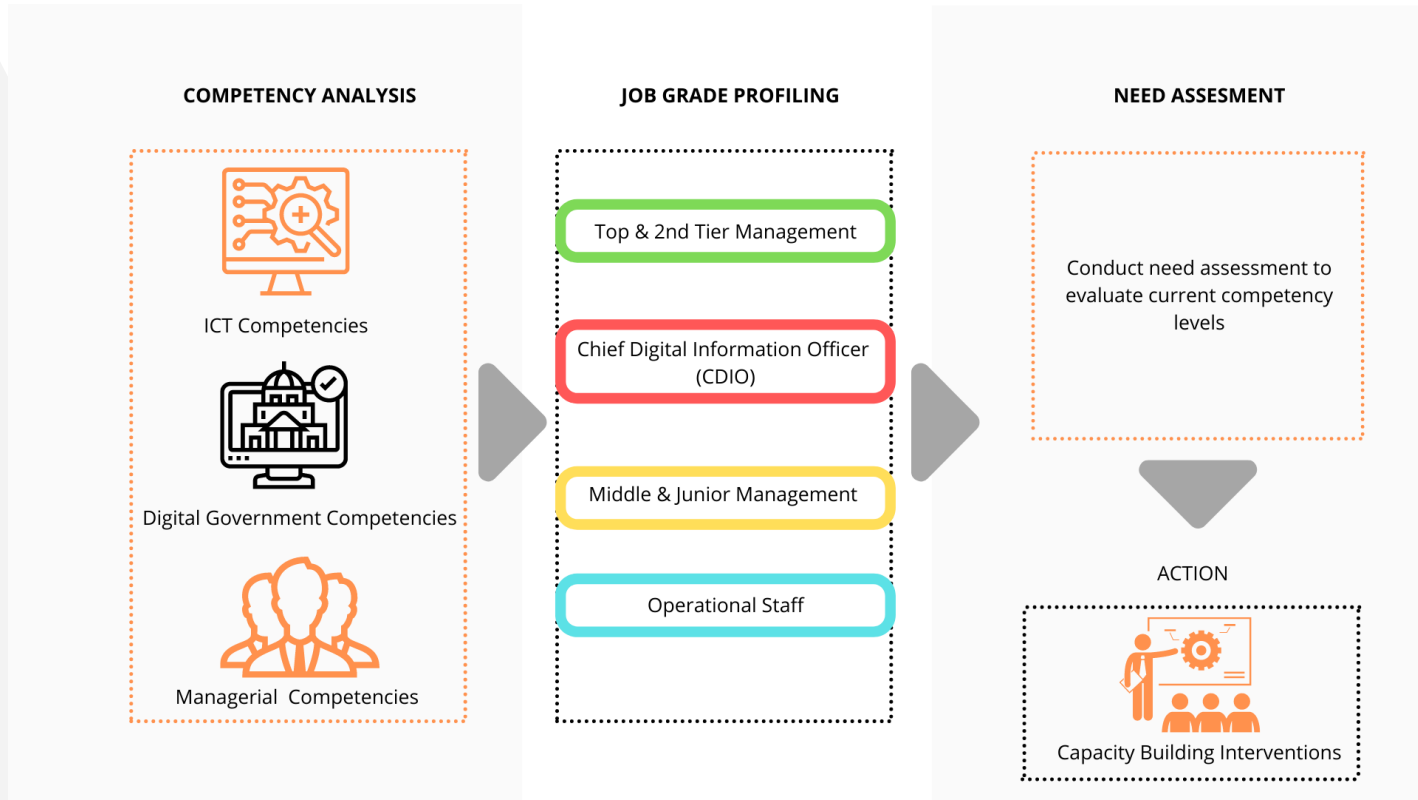

Digital Government Competency Framework

The government workforce has a complex and diversified organization, and the competencies of its employees vary greatly. Further, currently, it is difficult to capacitate many officials systematically in a short period. Furthermore, there is no unified approach for capacity building across the government.

The Digital Government Competency Framework can help transform the workforce progressively by specifying the required skills for various employment levels.

Hence, ICTA has formulated the Digital Government Competency Framework to identify the required level of competencies. To identify the competency gap, a Need Assessment Toolkit will be used.

Digital Government Competency Framework

NEXTGENGOV OFFICER INITIATIVE

NextGen gov Officers

All the employees in Sri Lanka government organizations (approximately 1.5M) cannot be reached direct capacity building

Lack of opportunities for competent gov officers to lead and facilitate digital government transformation

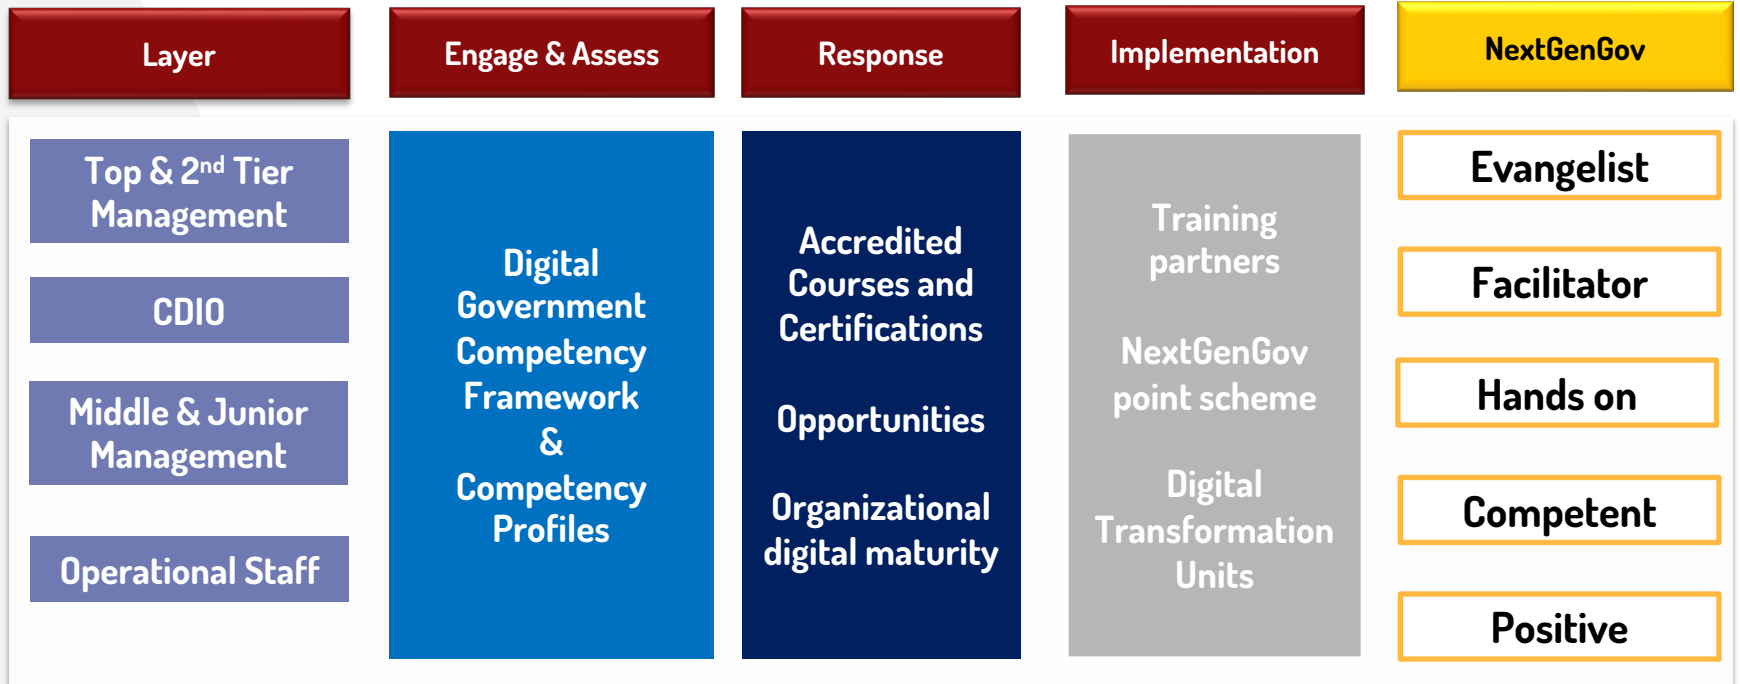

Absence of a mechanism to reach all levels employees on digital government adoption

Technology adoption should be organic and positively embraced by the government officials at all levels

A mechanism to create a pool of government employees from all level to become an evangelists of the cultural shift

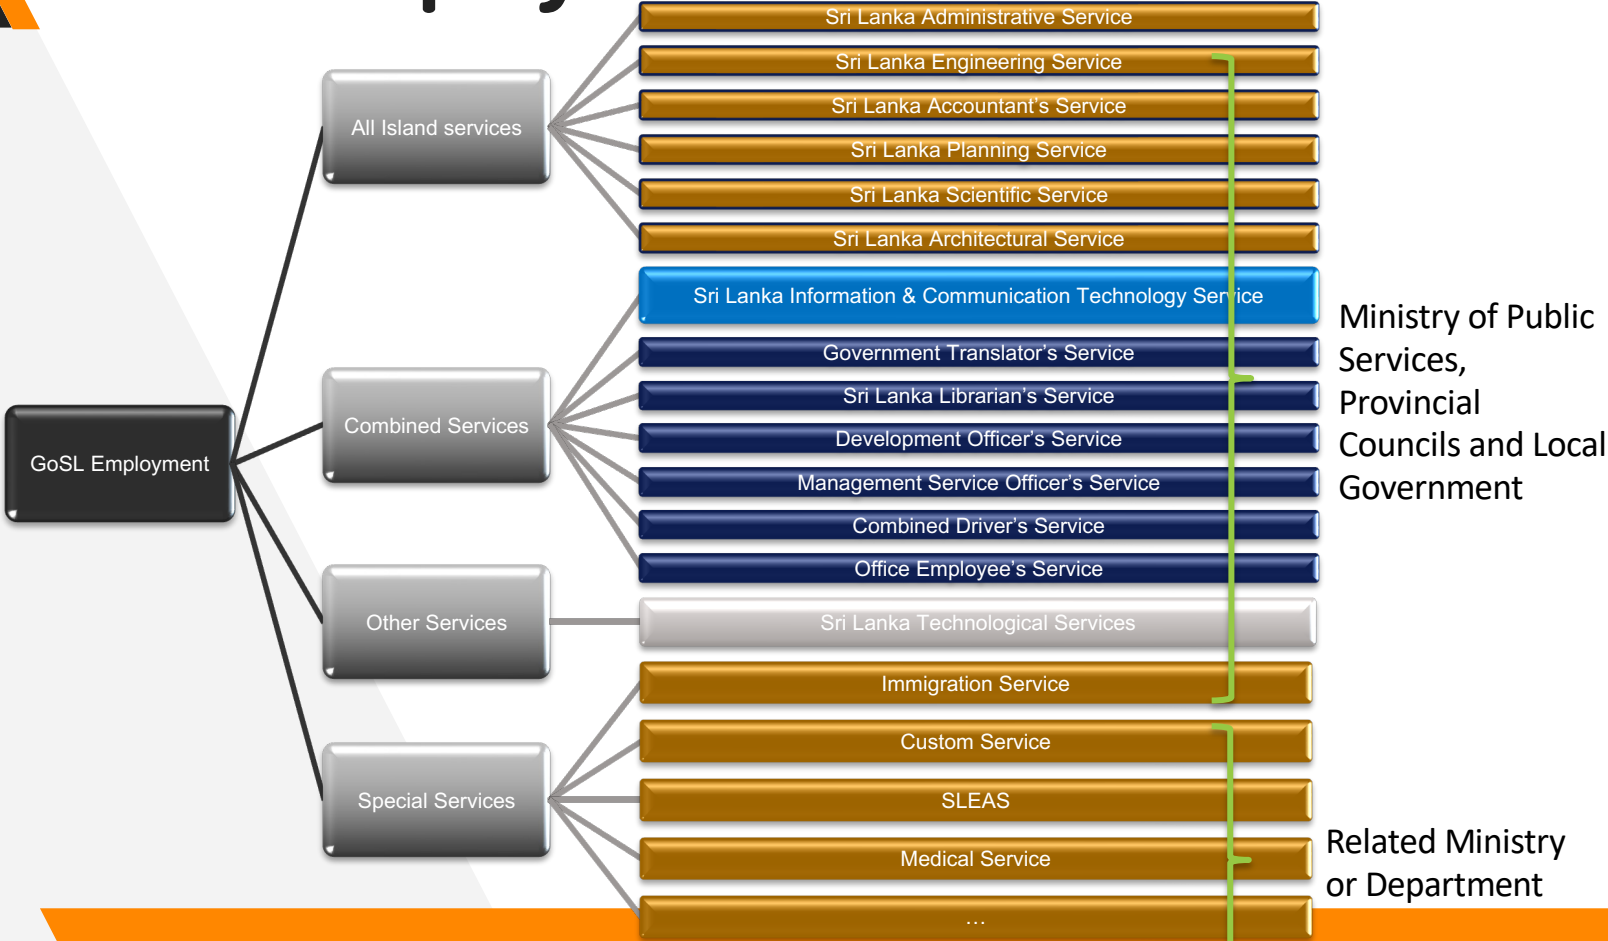

Be a NextGenGov Officer

Digital Maturity Model
