

Agenda *

Wednesday, 13 November 2024 – 9:00 a.m. – 10:30 a.m.

Moderator: Saras Jagwanth, Interregional Advisor, DPIDG / UN DESA

9:00 - 9:10 a.m. Introduction by moderator

9:10 – 9:25 a.m. Challenges and Opportunities

9:25 – 9:40 a.m. Innovative Practices from the UNPSA

9:40 – 9:55 a.m. Capacities Needed

9:55 – 10:25 a.m. Discussion and Q&A

10:25 – 10:30 a.m. Key insights by the moderator

* Agenda subject to change

Organizer

The Department of Economic and Social Affairs of the United Nations Secretariat (UN DESA)

The Department of Economic and Social Affairs of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint course of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Useful Readings and References

Report on Changing Mindsets to Realize the 2030 Agenda for Sustainable Development

The idea of producing a publication on Changing Mindsets to Realize the 2030 Agenda for Sustainable Development was conceived in 2019 as a follow-up to the workshop on “Mobilizing and Equipping Public Servants to Realize the 2030 Agenda”. The workshop brought together worldwide experts on the subject matter of changing mindsets and allowed for insightful discussions with many schools of public administration. It was organized by the United Nations Department of Economic and Social Affairs (UN DESA) during the United Nations Public Service Forum in Baku, Republic of Azerbaijan.

The publication is intended as a companion document to the Curriculum on Governance for the Sustainable Development Goals and its Toolkit on Changing Mindsets in Public Institutions to Implement the 2030 Agenda for Sustainable Development developed by UN DESA, Division for Public Institutions and Digital Government (DPIDG). UN DESA/DPIDG’s mission is to support governments in strengthening their capacities to translate the Sustainable Development Goals (SDGs) and other internationally agreed goals into institutional arrangements, strategies, and programmes for effective service delivery and participatory, accountable, and inclusive decision-making processes.

Curriculum on Governance for the Sustainable Development Goals

The 2030 Agenda for Sustainable Development recognizes the need to build peaceful, just and inclusive societies that provide equal access to justice and that are based on respect for human rights (including the right to development), on effective rule of law and good governance at all levels and on transparent, effective and accountable institutions”. Goal 16 of the 2030 Agenda specifically calls for effective, accountable and inclusive institutions at all levels. Indeed, institutions play a critical role in the achievement of all the Sustainable Development Goals (SDGs) and targets. However, public sector reforms needed to implement the SDGs continue to be a major and vexing challenge in many countries. The 11 Principles of Effective Governance for Sustainable Development, developed by the UN Committee of Experts on Public Administration and endorsed in 2018 by the Economic and Social Council, provide

practical, expert guidance to interested countries in a broad range of governance challenges associated with implementation of the 2030 Agenda. The Curriculum Toolkits address the 11 Principles of Effective Governance. The Curriculum on Governance for the Sustainable Development Goals aims to provide a holistic and integrated framework for capacity development in the area of governance and public institutions. It aims to promote critical understanding of sustainable development issues, enhance governance capacity, and strengthen public servants' awareness of their active role in contributing to the achievement of the SDGs.

Report on Innovation and Digital Government for Public Service Delivery

This report summarizes presentations and outcomes of a facilitated online training workshop on Innovation, Digital Government and Public Service Delivery for Sustainable Development, which was jointly organized by the United Nations Department of Economic and Social Affairs, through the Division for Public Institutions and Digital Government (UN DESA/DPIDG) and the SIDS Unit of the Division for Sustainable Development Goals (DSDG), in collaboration with the Caribbean Centre for Development Administration (CARICAD) and the Caribbean Community (CARICOM), and with the

participation of the United Nations Economic Commission for Latin America and the Caribbean (UN ECLAC), among others.

UN E-Government Survey 2022

The United Nations E-Government Survey 2022 is the 12th edition of the United Nations' assessment of the digital government landscape across all 193 Member States. The E-Government Survey is informed by over two decades of longitudinal research, with a ranking of countries based on the United Nations E-Government Development Index (EGDI), a combination of primary data (collected and owned by the United Nations Department of Economic and Social Affairs) and secondary data from other UN agencies.

This edition of the Survey includes data analysis in global and regional contexts, a study of local e-government development based on the United Nations Local Online Service Index (LOSI), consideration of inclusion in the hybrid digital society, and a concluding chapter that outlines the trends and developments related to the future of digital government. As with all editions, it features extensive annexes on its data, methodology and related pilot study initiatives.

Digital Government Capability Assessment Handbook

The Digital Government Capability Assessment (DGCA) is a six-dimension framework of enablers to engage governments in discussions towards digital government transformation. Considering that digital government requires a multifaceted response from governments, the dimensions of the DGCA contain various statements which could guide governments in understanding gaps and policy entry points.

Completing a DGCA will help civil servants build new understanding of the level of digital government capability that exists in a country as a foundation for continued efforts to innovate and lead in the area of digital government and public service delivery. A DGCA is not meant to be used

to benchmark capability, but rather to develop an understanding of current capability and to inform decision making about where investments are needed to increase innovation and digital government capability leading to improvements in public service delivery.

Resolution adopted by the General Assembly on 25 September 2015: Transforming our world: the 2030 Agenda for Sustainable Development

This Agenda is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom. We recognize that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development.

All countries and all stakeholders, acting in collaborative partnership, will implement this plan. We are resolved to free the human race from the tyranny of poverty and want and to heal and secure our planet. We are determined to take the bold and transformative steps which are urgently needed to shift the world on to a sustainable and resilient path. As we embark on this collective journey, we pledge that no one will be left behind.

CEPA Strategy Guidance Notes

UN DESA's work is supported by a growing series of strategy guidance notes on the many facets of effective governance for sustainable development which embody the knowledge and experience of hundreds of committed expert

practitioners and academics from around the world. UN DESA gratefully acknowledges their very generous contribution of time and effort to thinking deeply about how to build effective, accountable and inclusive institutions at all levels and deliver on the shared vision for people and planet embodied in the 2030 Agenda.

In reading these strategy guidance notes, individuals in government ministries and agencies who are less familiar with a topic will be able to understand the fundamentals. Those who have taken initial steps with limited follow-through or impact will be able to identify how to adjust elements of their practice to achieve better results and to better embed and institutionalize the strategy in their organizations. Finally, those who are more advanced will be able to recognize the practices which contribute to its success.
