Development**

5.
Monitoring & Evaluation

Module 5 – Monitoring & Evaluation

Submodule 5.2 M&E Reporting, Dashboards and Trackers

[beta version]

Thus far, you...

- ✓ Were introduced to the definition and importance of M&E
- ✓ Knew about types of M&E frameworks
- ✓ Learned about how to build a Result-Based M&E System

In this section you will learn...

ICT and SDGs

- ICT indicators to SDG monitoring
- SDG Monitoring Challenges
- Introduction to Toolkit

Reporting Outcome

- Dashboards and Trackers
- Case Study
- Voluntary National Review

Audit and Public Financial Management

- Auditing SDGs
- Supreme Audit Institute
- Automation in Public Financial Management

Objective

By the end of this submodule, you will be able to:

- ✓ Understand how ICT helps in SDGs monitoring
- ✓ Familiarize with dashboards and trackers as tools for reporting
- ✓ Understand the importance of national report
- ✓ Understand the role of auditing and public financial management

Completion time

- In total there are around **40 pages** for this submodule. It will take approximately **60 to 90 minutes** for each user to complete. This is an indication and can differ per user.
- Feel free to skip some parts of this submodule if you are already familiar with the content.

Other Information

- You can read along (PDF) as well as listen to the content (audio) while taking this course;

Course material (PDF) can be downloaded in the Moodle folder

Audio can be streamed on the corresponding slide on Moodle

Let's start!

Clarification

- In submodule 5.1, we talked about the general framework of Monitor & Evaluation on evaluating SDG/digital government policies
- In submodule 5.2, we will focus more on reporting M&E, how to use digital government and ICT as tools to support M&E in SDG implementation

SUSTAINABLE DEVELOPMENT GOALS

The success of the Sustainable Development Goals rests to a large extent on

Monitoring,

Review,

Follow-up process

You can learn more about SDGs in **Submodule 2.1**

 169 targets

 231 indicators
(7 ICT indicators)

Global SDG Indicators

Each Goal and each Targets are monitored through **specified indicators.**

Currently, there are **231 Global SDGs Indicators.**

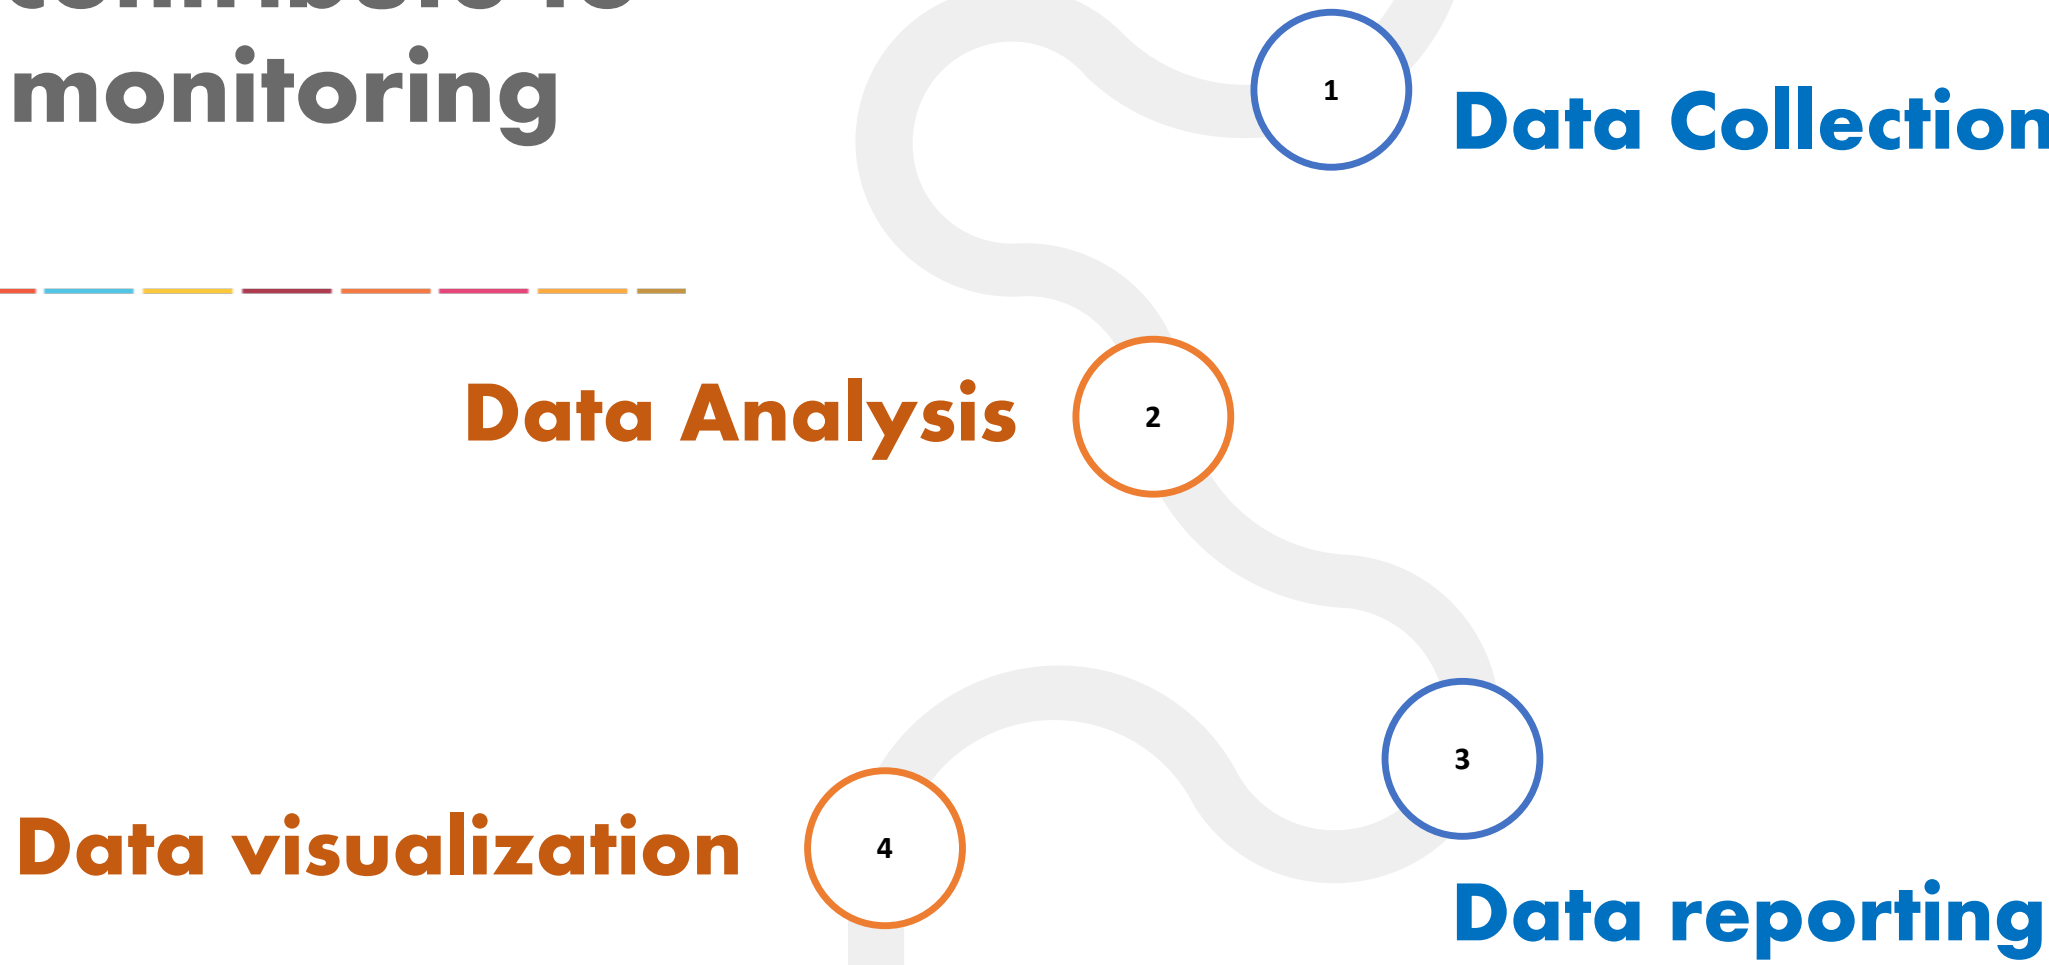

Global SDG Indicators: Tier Classifications

Based on **data availability** and **standards of methodology**, each indicator is classified into corresponding tiers by the Inter-Agency and Expert Group on SDG Indicators (IAEG-SDGs)

Indicator is conceptually clear	?	✓	✓
Internationally established methodology	?	✓	✓
Available standards	?	✓	✓
Data are regularly produced by countries	?	?	✓

ICTs can contribute to the SDG monitoring lifecycle!

Examples of utilizing ICT in SDG monitoring

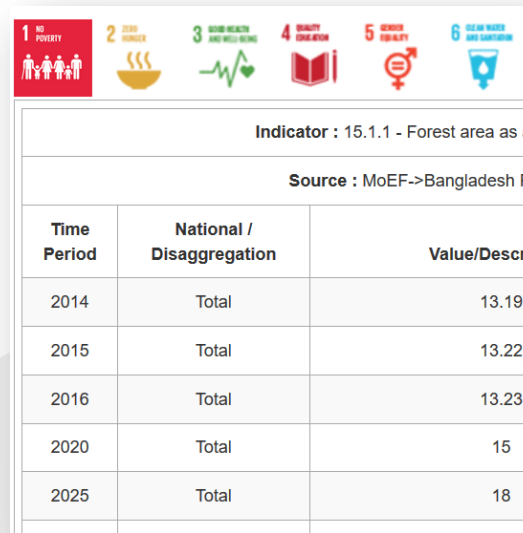

Data Collection

**High ICT penetration to
Connect the
unconnected**

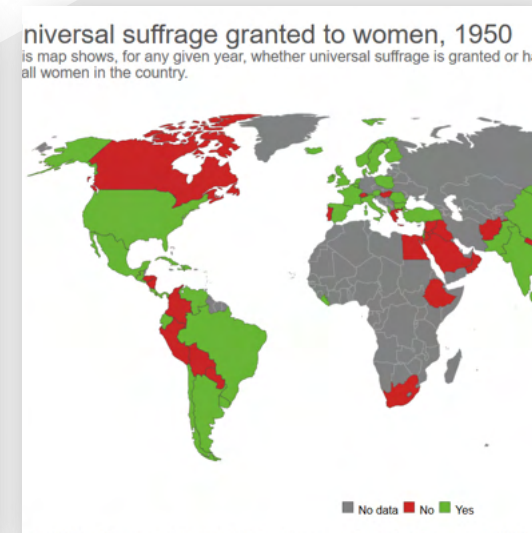

Data Analysis

**Big data for more
informed policy-
making**

Data Reporting

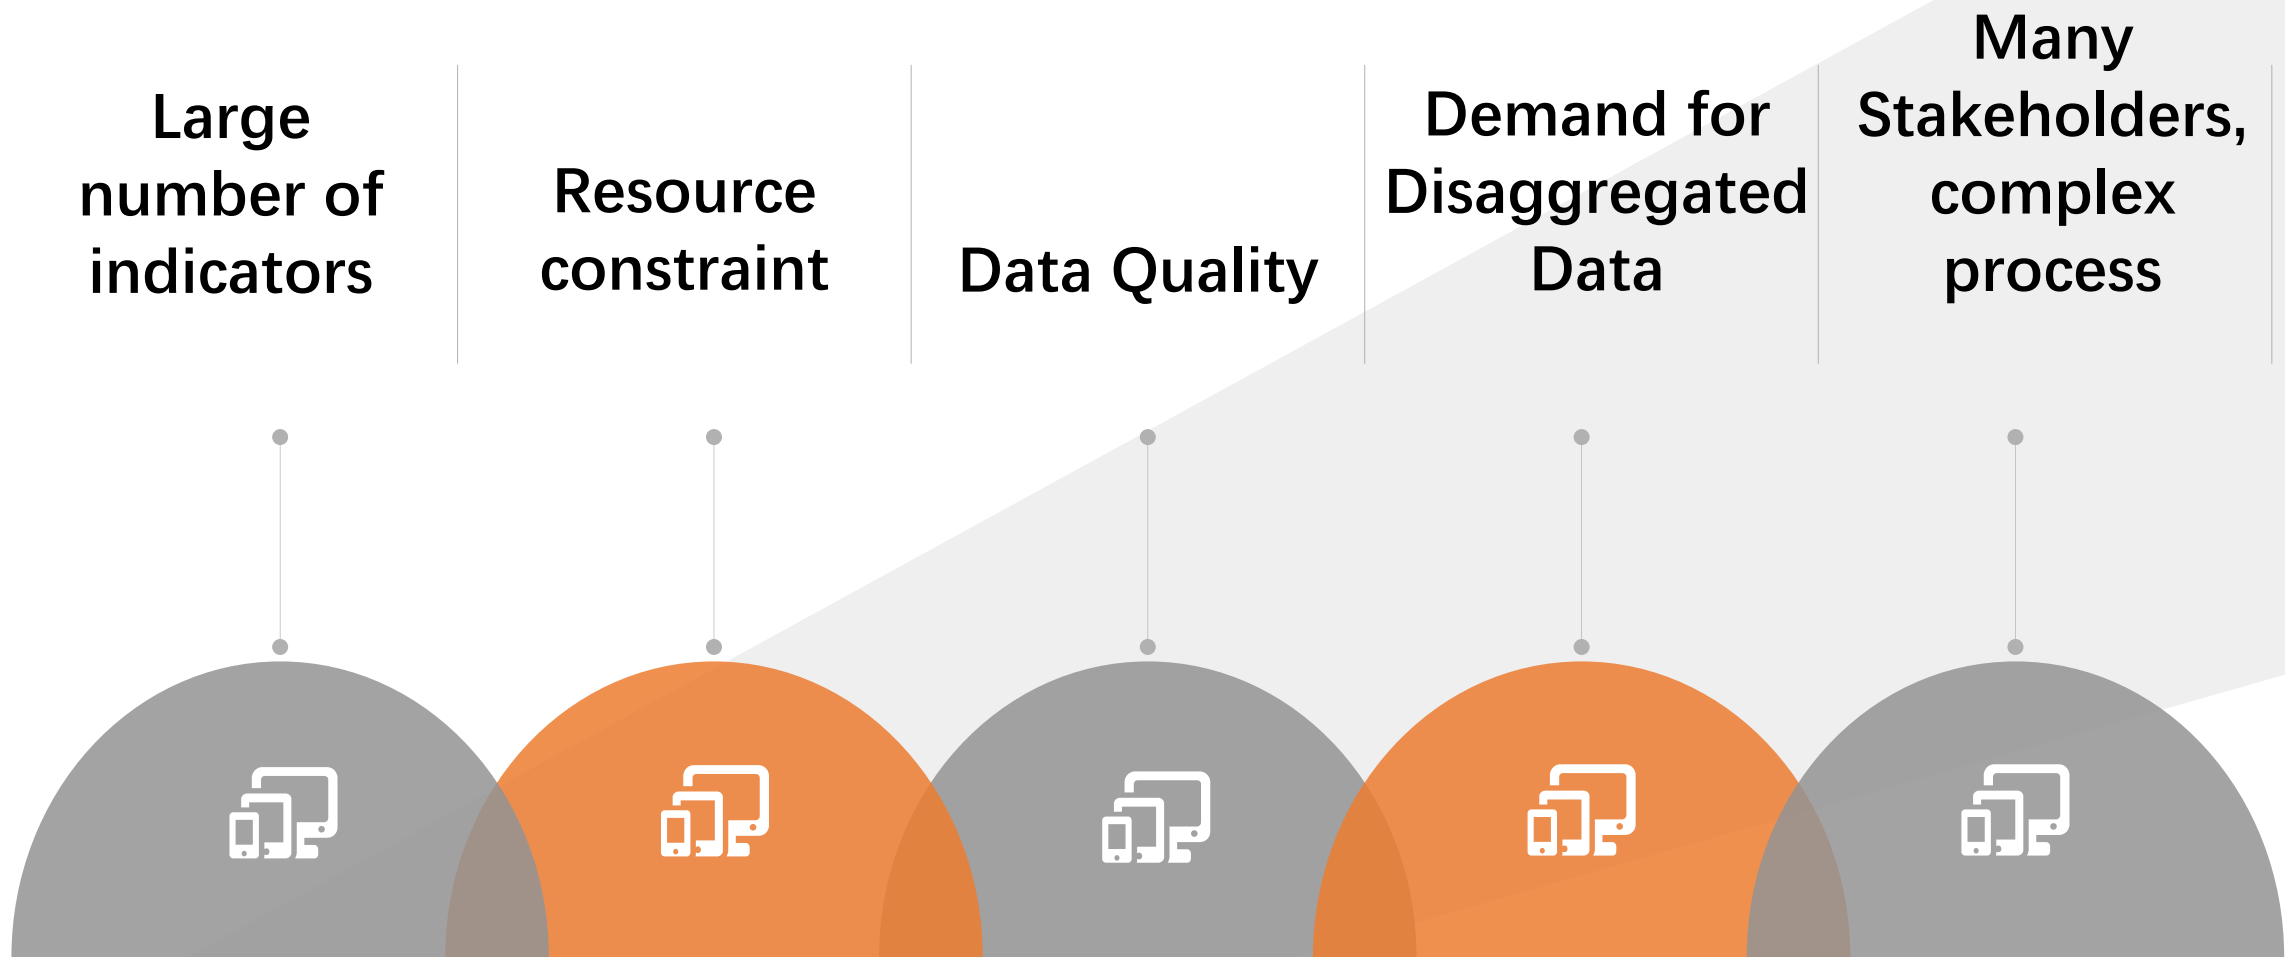

**National SDG tracker
for one-stop timely
reporting**

Data Visualization

**Visualization tech for
Vivid and interactive
data presentation**

SDGs Monitoring Challenges

SDGs Monitoring Challenges: Data

High Demand
VS
Low Funding

Cost: USD 2.8-3.0 billion
per year up to 2030

- Innovative ways of leveraging new sources of finance
- Support from national systems
- User perspectives & policy relevance of data emerging”

Available resource: UN SDG Monitoring and Reporting Toolkit

Global Policies and Guidelines

Data Resources

SDG Localization & Implementation

Capacity Building and Coordination

Global SDG Indicators

- > Global SDG Database
- > UN Open Data Hub
- > SDG API

Thematic and Regional Data Resources

- > Strengthening gender perspectives
- > Global Migration Indicators
- > WHO Health Statistics
- > Global Health Observatory
- > FAO portal on SDG indicators
- > Asia Pacific SDG Data Portals

Baseline and Progress reports

- > UN Women: Turning Promises into action
- > SG's Progress Report 2018
- > SDGs Report 2018
- > Asia and the Pacific SDG Progress Report 2017
- > Statistical Yearbook for Asia and the Pacific 2016: SDG Baseline Report

Two Approaches

Dashboards vs. Trackers

Dashboards are mainly used to show an overview of the project achievements/milestones so far. It is a reporting tool for straight-forward and broad display and can directly benefit the decision-making process.

Overview

Trackers more reflect the operational side of the project. It is a monitoring tool for frequent progress checking and detailed analysis.

Operational progress

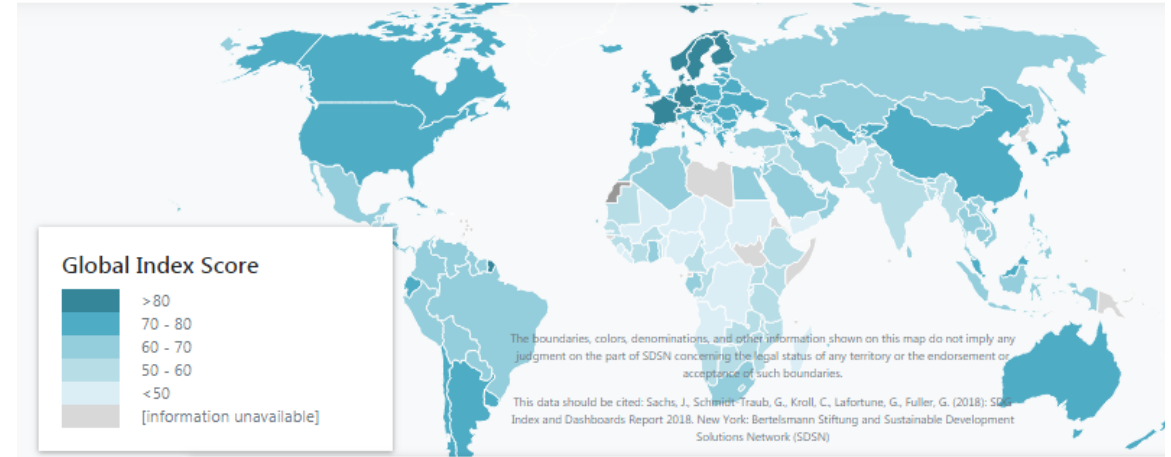

ICT-enabled mechanism

Sustainable Development Goals

score

Canada: Progress tracker for the Open Government Project

The tracker was developed in addition to the yearly [self-assessment reports](#) that we provide to the Open Government Partnership (OGP).

 Access to information	 Requests for personal information	 Expand open data	 Open information	 Measuring performance	 Open government skills
 Service strategy	 Culture and heritage collections	 Spending and procurement	 Fiscal transparency	 Grants and contributions	 Information on Canadian corporations
 Open maps	 Open science	 Open Data Exchange	 Open Data Canada	 Extractive Sector Transparency Measures Act	 Support openness and transparency globally

open.canada.ca/en/commitment/tracker/third-biennial/commitment-1-enhance-access-information

Tracking the progress of digital government commitments

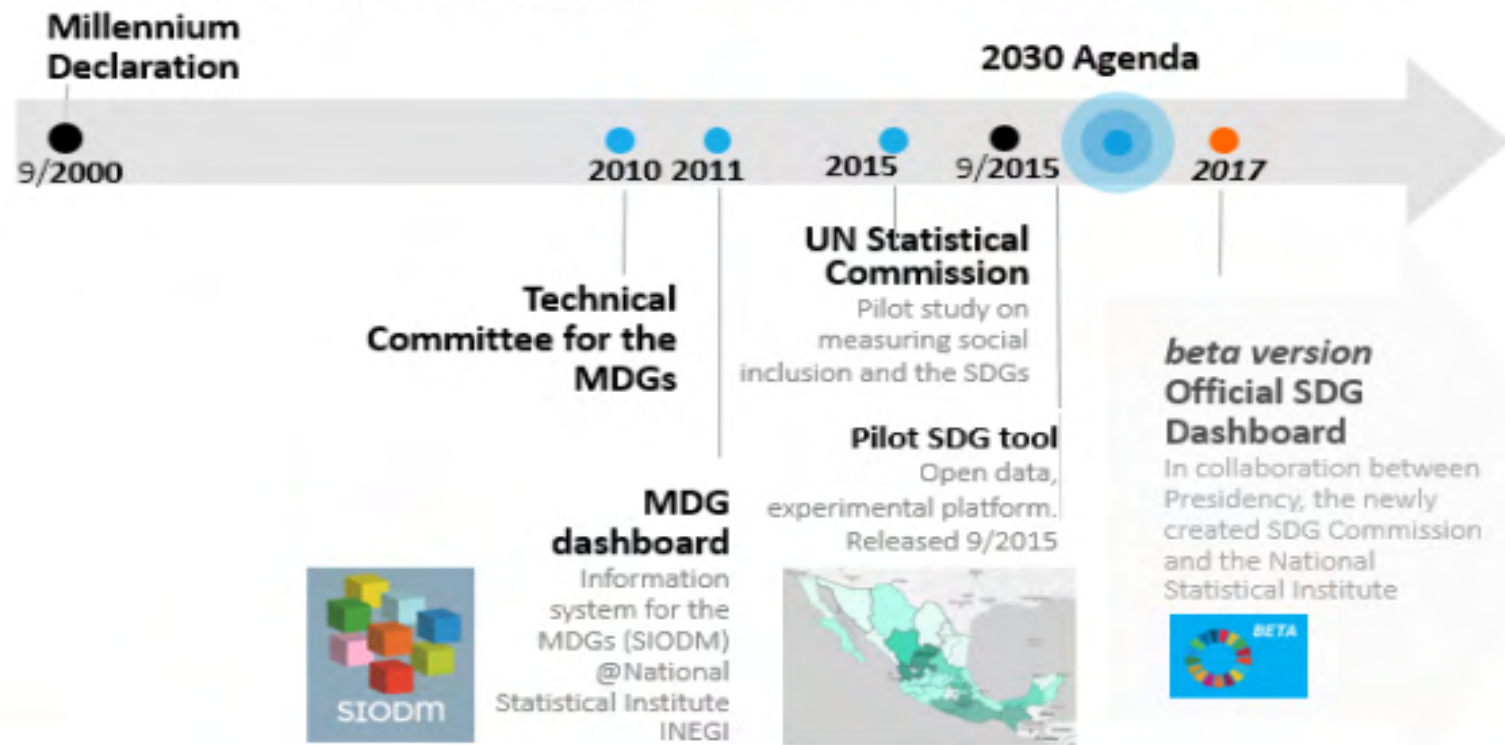

Canada: Progress tracker for the Open Government Project

Commitment 2: Streamline requests for personal information				
 Commitment 1: Enhance access to information		 Commitment 3: Expand and improve open data		
Description	Planned result	Key indicator	Status	Challenge
Indicator	Target	Latest actual data (and data collection date)		
Percentage of personal information requests responded to within established timelines (30 days or within an extension period provided for in the Act)	Increase in percentage of personal information requests responded to within established timelines from 80.4% in 2015-16 to 85% in 2019-20	80.4% of requests were responded to within timelines in 2016-17		
User-rated ease of access to make personal information requests	60% of users who respond to the survey will rate ease of access positively	This data will be gathered through the new central website. The launch of the central website is planned for 2018.		

Indicator, Target and actual data comparison

Mexico

Population 120 mill, federal system, 32 Federal Entities and 2,456 Municipalities

Reporting on SDGs, a global effort

Global Level

The Sustainable Development Goals Report
2018

National Level

Lessons from the SDG report 2018: National reporting is important!

- Build standards for SDG data and metadata will improve transparency and efficiency
- National reporting and dissemination platforms are key instruments for SDG implementation and review
- Using geospatial data can ensure that no one is left behind

Voluntary National Reviews

- ✓ sharing of experiences
- ✓ strengthen policies and institutions of governments
- ✓ mobilize multi-stakeholder support and partnerships

MONGOLIA VOLUNTARY NATIONAL REVIEW REPORT 2019

IMPLEMENTATION OF THE SUSTAINABLE DEVELOPMENT GOALS

Voluntary National Reviews

- The Report describes how localization of the SDGs is underway in the country, and how they will be achieved through development policy planning processes, ensuring policy integration, comprehensiveness, coherence, rationalization, and multi-stakeholder participation.
- The Report highlights actions taken to identify population groups that are at risk of being left behind in the local context, incorporating their needs and requirements under the principle of “Leaving No One Behind”.

**Auditing and
Financial
Management**

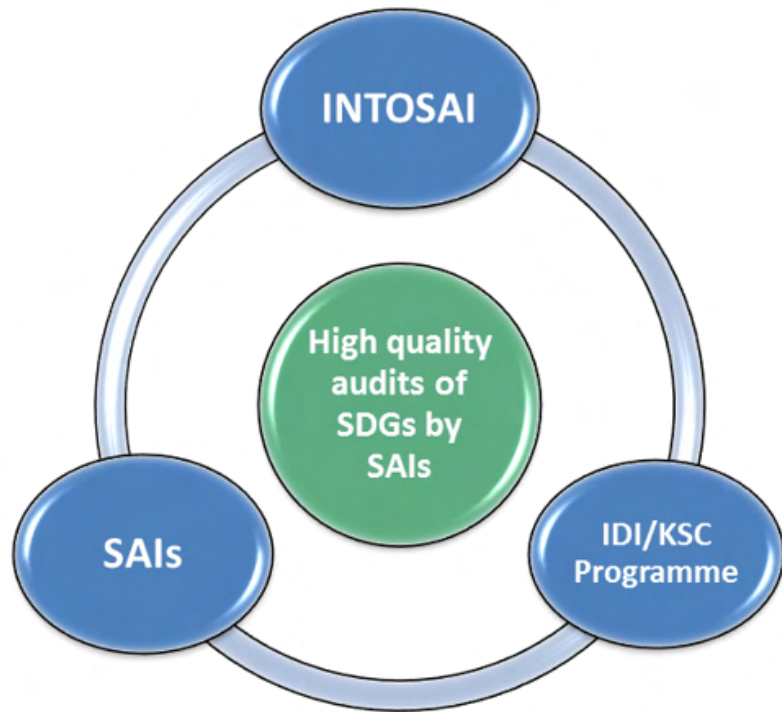

An audit is an objective examination and evaluation of the financial statements of an organization to make sure that the records are a fair and accurate representation of the transactions they claim to represent.

Audit

Role of SAs

- Assessing the preparedness of national governments to implement the SDGs,
- Undertaking performance audits in the context of the SDGs,
- Contributing to the implementation of SDG 16, which envisages effective, accountable and transparent institutions
- Possibilities for SAs to act as models of transparency and accountability in their own operations.

**Automation in
Financial Reporting**

Save time from mundane
manual accounting

Automation in Financial Reporting

Target 16.6 Develop effective, accountable and transparent institutions at all levels *through automating government reporting and transparency*

Automation in Financial Reporting

Financial Management Information Systems (FMIS) support the automation and integration of public financial management processes including

budget formulation

execution

accounting

reporting

Let's take a break!

Are you up for a challenge?

Brainstorming

Think about how ICT help in monitoring SDGs through...

- Data Collection
- Data Reporting

Brainstorming

1. What data do you have?
 - a) Is data disaggregated?
 - b) Have you fully made use of your data?
 - c) Are you sharing your data?

2. What data do you need?
 - a) Who are your data partners?
 - b) How can you strengthen your individual and institutional capacities in data and statistics?
 - c) Is there data leadership/stewardship in your institution?

3. How to tackle the challenges of lack of data, lack of disaggregated data, lack of understanding data?

Conclusion

- ICT can contribute to the whole SDG monitoring cycle.
- Dashboards and Trackers are two essential tools to report M&E outcome
- National Reporting is also important!
- utilize ICT can for better financial governance

Congratulations!

You have reached the end of submodule 5.2
Thank you for joining us in this exciting journey.

Under this submodule, you:

- ✓ Understood how ICT helps in SDGs monitoring
- ✓ Familiarized dashboards and trackers as tools for reporting
- ✓ Understood the importance of national report
- ✓ Understood the role of auditing and public financial management

You may proceed to the next submodule 6.1
