By the end of this submodule, you will be able to:

✓ Learn from the actual cases of digital government implementations in Bangladesh and Ethiopia

Completion time

- In total there are around **20 pages** for this submodule. It will take approximately **30 to 40 minutes** for each user to complete. This is an indication and can differ per user.

- Feel free to skip some parts of this submodule if you are already familiar with the content.

Other Information

- You can read along (PDF) as well as listen to the content (audio) while taking this course;
  📄 Course material (PDF) can be downloaded in the Moodle folder

  🎧 Audio can be streamed on the corresponding slide on Moodle

Let's start!

Case Studies - Bangladesh

Case 1 -
Not in Education, Employment or Training (NEET)

- Addresses SDG goals 1, 4, 5 and 8

- Joint project between the Access to Information (a2i) and the Ministry of Youth and Sports

- Introduced digitized service delivery including self-employment and entrepreneurship development through ICT skills training programs

- Main target groups: vulnerable populations including expatriate youths and rural youths

8

Case 2 - Multimedia Class Room

- Addresses SDG goal 4

- Joint initiative of UNDESA, a2i and the Government of Bangladesh

- Introduced multimedia classrooms and teacher-led content development

- Trained teachers on making ICT aided educational content and electronic versions of textbooks

- Main target: make teaching and learning more effective and enjoyable

9

Case 3 - Digital Identity

- Addresses SDG goal 16

- Initiative led by the a2i

- Introduced the Smart National ID cards (NID).

- NIDs hold biometric details of cardholders and allow them access to 22 services

- Main target: including the entire population to grant access to essential services, help in achieving SDGs which rely on measuring people and their status, and ensure continual improvement

10

Case 4 – Social Protection

- Addresses SDG goal 1

- Initiative led by the a2i with support from Bill & Melinda Gates Foundation

- Facilitated the piloting of electronic social safety net payments

- Plans to digitize all G2P payments

- Main target: reduce cost for the governments as well as the beneficiaries, improving efficiency, and making the social welfare services more inclusive

Case 5 — Financial Inclusion

- Addresses SDG goals 7, 8 and 11

- Initiative by the a2i supported by UNDP and UNSAID

- Attempting to build an inclusive digital financial system through ICT initiatives

- Aims to link financial service provides with financial inclusion experts

- Implemented policies and initiatives for financial inclusion, for example, providing rural credit services to disadvantaged groups

- Main target: Upscaling the current transfer system, improve communications on available products, and introduce strategy / framework to widen e-payment

12

Case Studies - Ethiopia

Let's take a break!

Are you up for a challenge?

Conclusion

Congratulations!

You have reached the end of submodule 6.1 on the Case Studies.

Thank you for joining us in this exciting journey.
