2022. 7. 7.

# CONTENTS

**1. Overview of Korea's Digital Government**

**2. Representative services**

**3. Success Factors and Future**

The background of the slide is a dark, futuristic cityscape at night. The buildings are rendered in a dark, almost black color, with some lights visible on their surfaces. Overlaid on this cityscape are numerous glowing, wavy lines in shades of blue and purple, which appear to be data streams or digital paths. These lines flow across the scene, some curving and looping, creating a sense of dynamic movement and connectivity. The overall atmosphere is high-tech and digital.

# **1. Overview of Korea's Digital Government**

# Korean Digital Government in Numbers

**17K** public sector information systems

The system handles the largest amount of services for citizens

### Collaborative Information linking

The system provides the largest number of information links

Commodity Management

Vehicle Management

Common Property

Service Management

Council

Planning

Communication

Legislation

The background of the slide is a dark, futuristic cityscape at night. The buildings are rendered in a dark, almost black color, with some lights visible on their surfaces. Overlaid on this cityscape are numerous glowing blue and purple light trails that curve and swirl across the scene, suggesting movement and data flow. There are also several small, glowing blue dots scattered throughout the image, some of which appear to be data points or nodes in a network. The overall atmosphere is one of high-tech, digital connectivity.

## 2. Representative services

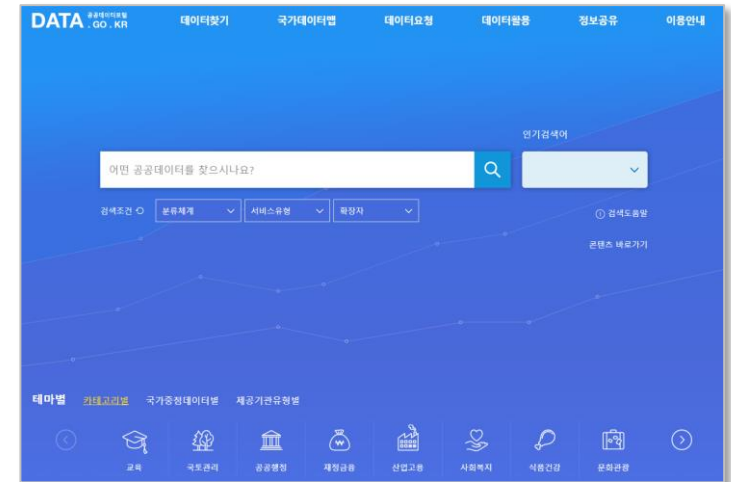

# Single Service Window - GOV.KR (GOV24)

- Services available on the website (gov.kr) and mobile application 24/7
- Services and information personalized for each citizen
- Services categorized by life cycle
- One-Stop Services Packages

## Integrated public open data portal of the Korean Government

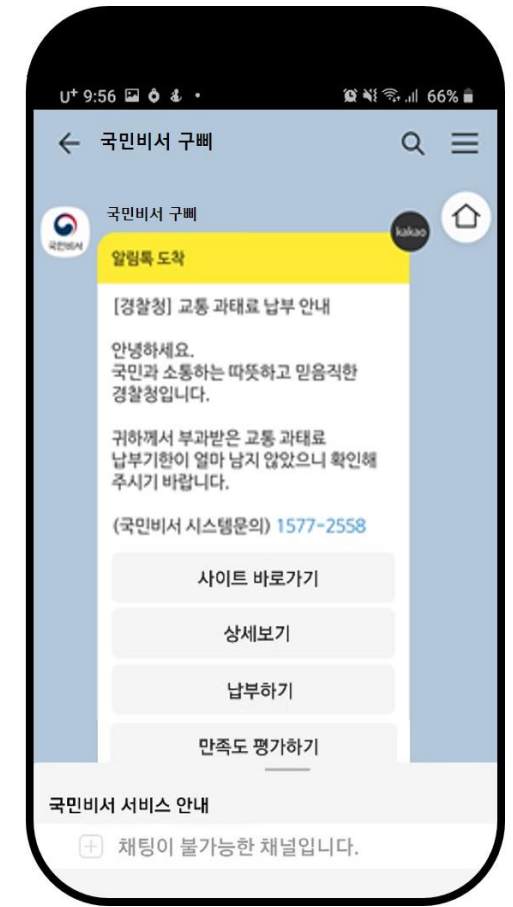

- About 50,000 datasets from 993 public institutions
- More than 7,000 open APIs
- Data catalogue, National Core Data, Standard Datasets
- Annual evaluation of open data provision & management

# Virtual assistant for public

## Customizable service channels

- Citizens can select and customize their own service channel using private channel (Kakao, Naver, Toss, etc)
- To increase agility, availability, and convenience of government-citizen interaction

# Mobile ID

Innovating public and private services through safe and convenient digital identity verification on/offline

[Offline]

License Verification

Identification  
(bank, civil affair)

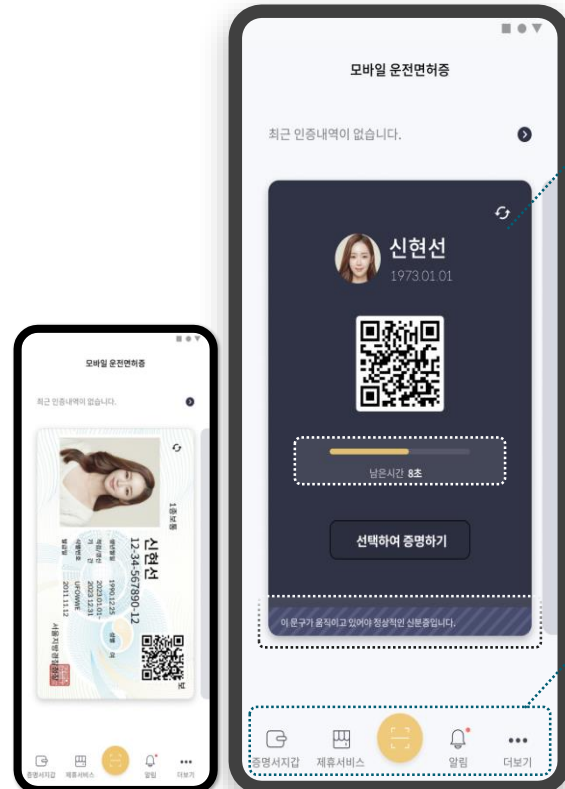

[Online]

rent a car/mobility

certified documents

# COVID-19 Emergency Relief Fund

Interconnection of information systems of administrative institutions and private businesses to allow all citizens to receive the emergency relief fund

Through all local governments, **offline application procedures open** for application and payment in local currencies or certificates

Procedures of filing objections prior to application open through all local governments in Korea

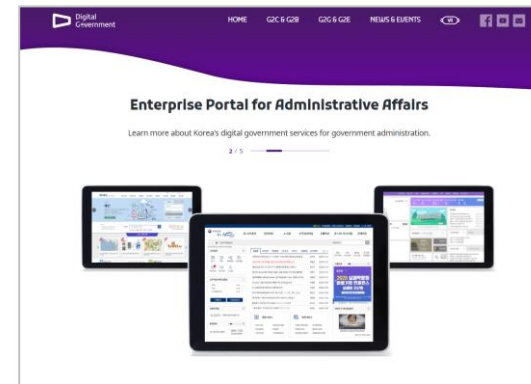

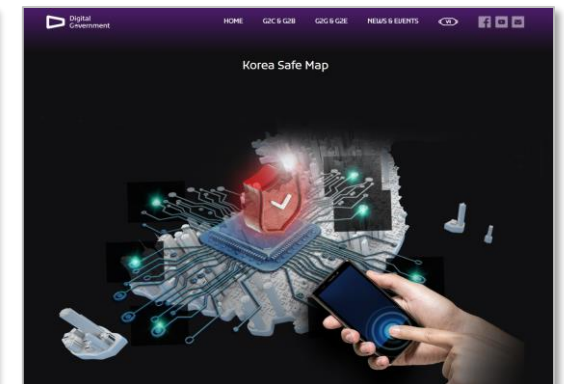

Through private businesses like credit card companies, **online application procedures open** for application and payment online without having to make offline visits  
**online application procedures open** for application and payment online without having to make offline visits

Real-time stats check on the emergency relief fund application by each local government

The emergency relief fund application system infrastructures, like the integrated database, are installed in the National Information Resources Service (Government Integrated Data Center), which is the organization under the Ministry of the Interior and Safety

## Introduction website of the Korean digital government

- 29 best practices of Korean digital government
- VR tour of the Digital Government Exhibit Hall
- Links and materials for further information
- News and updates
