This book, by a former IPAC president, and an insider to the events described, tells the story of the first socialist government elected in North America. Among its most noteworthy achievements was the pioneering of the medicare model of national health care insurance that has become emblematic of Canadian public policy. The author details the trials and struggles along the road to this achievement, as well as providing an instructive overview of how such ambitions are made into policy. This tale also involves the story of how a professional public service was forged in tumultuous times.

As we meet in May 2004, an historical change will have taken place in Europe. Several former communist countries of Central and Eastern Europe will have joined the European Union, an unprecedented voluntary association of democratic states with market economies, and its emerging Constitutional identity. The entire structure of political, economic, and social relations in Europe will change. What will be the impact of this change to public policy and administration in countries both inside and outside the EU borders? What will the challenges be of this new membership to public policy and administration of the new member states? What actions will need to be taken to avoid the new divide between them and the other countries of the region, and to harmonize the way in which public interests are followed throughout the entire continent?
